650 gr. € 19,00

Suprendol

Suprendol is a blend of oils designed to support the energy requirements of racing pigeons. Its formula is specifically designed to optimize and enhance velocity, endurance and overall race performance. It is also a useful energy supplement in moments of heightened energy requirement, including moulting, breeding and sickness.

Use: - during the breeding period: 2 weeks before coupling, daily until the laying performance.

- rest of the year: 2 to 3 days for each period of stress.

Dose: 15 ml (1 tablespoon) per 1 kg food.

500 ml. € 16,00

Carbosol

Carbosol Animal Health Supplement is a soluble, slow release energy booster, ideal for pigeons use in the days preceding a race, or at times of high energy demand. Loading carbohydrate using Vydex Carbosol can increase endurance capacity by up to 33%, and muscle glycogen levels by 50%. As well as providing high energy levels without the ingestion of bulky foods, Carbosol may assist in recovery after racing.

Dose: Mix one heaped dessertspoon with 1 liter water.

500 gr. € 19,00

Iron & B12

Iron & B12 is a powder containing absorbable iron, thanks to which the quantity of oxygen transported by the blood is maximal. This enables the pigeon to make great efforts and it increases the recovery after efforts. Important in case of weakening or illness and for young pigeons. Dose: 5 gr. on moisturised food for 20 pigeons 2 times per week.

650 gr. € 19,00

Creatine

Creatine is vital to the transfer of energy across the cell, enhancing energy levels and stamina. In also buffering lactic acid, it prevents pain and cramping. A regular intake of Creatine Monohydrate can increase the power and physical performance of a racing pigeon or greyhound.

- 100% Pure Creatine
- Enhances power, performance and strength

Dose: the first 5 days 5 gr. on 1 liter water. Or on 500 gr. food. After that 3 times in the week 4 gr. on 1 liter water. Start 3 weeks before racing season.

500 gr. € 19,00

Garlic powder

Garlic powder is a natural help against worm and Coccidien. It's beneficial to bloodstream and gives softer feathers and extremely white noses.

Dose: 1 or 2 times per week one teaspoon on 500 gr. food.

1.0 kg. € 17,00

Recovery Superior

Revolutionary recovery in Top sport. Special prepared Protein (Pepto-Pro) takes care of direct recovery of the Muscles (in 2 hours) after the race. Normally the recovery takes two days. You can imagine the advantages to be able to go training after a race directly. Before this product was only accessible for Top,sporters in the Tour de France and Olympic Games.

Dose: Racing season 5 gr. in 1 liter water – or at 500 gr. food (oil) direct after the race and in Breeding season 2x per week 5 gr. at 1 liter water.

150 gr. € 18,00 300 gr. € 28,00
