## Carbosol

Carbosol Animal Health Supplement is a soluble, slow release energy booster, ideal for pigeons use in the days preceding a race, or at times of high energy demand. Loading carbohydrate using Vydex Carbosol can increase endurance capacity by up to 33%, and muscle glycogen levels by 50%. As well as providing high energy levels without the ingestion of bulky foods, Carbosol may assist in recovery after racing. Dose: Mix one heaped dessertspoon with 1 liter water.

500 gr. € 20,00

## Creatine

Creatine is vital to the transfer of energy across the cell, enhancing energy levels and stamina. In also buffering lactic acid, it prevents pain and cramping.

A regular intake of Creatine Monohydrate can increase the power and physical performance of a racing pigeon. Enhances power, performance and strength

**Dose:** the first 5 days 5 gr. on 1 liter water. Or on 500 gr. food. After that 3 times in the week 4 gr. on 1 liter water. Start 3 weeks before racing season.

500 gr. € 24,00

## Recovery Superior

Revolutionary recovery in Top sport. Special prepared Protein (Pepto-Pro) takes care of direct recovery of the Muscles (in 2 hours) after the race. Normally the recovery takes two days. You can imagine the advantages to be able to go training after a race directly. Before this product was only accessible for Top, sporters in the Tour de France and Olympic Games. **Dose:** Racing season 5 gr. in 1 liter water – or at 500 gr. food (oil) direct after the race and in Breeding season 2x per week 5 gr. at 1 liter water.

150 gr. € 20,00 300 gr. € 32,00

## Ascorbivite

Ascorbivite Vitamin C is a concentrated dietary booster. It is specifically designed to enhance the daily nutritional intake of your animal or bird in a convenient, easy-to-administer, soluble form. It can be used to good effect on its own, or complemented by Entrodex.

Dose: 5 Gramm 3 times per week in 1 liter water.

650 gr. € 21,00

## Soldex

Soldex is a complete multi-vitamin and mineral supplement, providing for many of your pigeons' nutritional needs. Its improved concentrated formula contains 5000mg calcium gluconate and 300mg vitamin C as part of a careful blend of minerals. Not only does SolDex prevent vitamin or mineral deficiency, but its addition of carnitine enhances energy metabolism.

**Dose:** 1 gr. 2 times per week on 1 liter water.

100 gr. € 11,00

## Suprendol

Suprendol is a blend of oils designed to support the energy requirements of racing pigeons. Its formula is specifically designed to optimize and enhance velocity, endurance and overall race performance. It is also a useful energy supplement in moments of heightened energy requirement, including moulting, breeding and sickness.

**Use:** - during the breeding period: 2 weeks before coupling, daily until the laying performance.

- rest of the year: 2 to 3 days for each period of stress.

**Dose:** 15 ml (1 tablespoon) per 1 kg food.

500 ml. € 17,00

## Iron & B12

Iron & B12 is a powder containing absorbable iron, thanks to which the quantity of oxygen transported by the blood is maximal. This enables the pigeon to make great efforts and it increases the recovery after efforts. Important in case of weakening or illness and for young pigeons.

**Dose:** 5 gr. on moisturised food for 20 pigeons 2 times per week.

650 gr. € 20,00

## Super power plus

Most Strongest muscle strengthener in the pigeon world.

This combination contains HMB, Creatine, L-Glutamine, Vanadium en Chrome. This combination provides a significant synergistic effect, for example, together the components of HMB/Creatine/L-Glutamine will increase endurance performance. Assist in sparing the muscles. Potentially increase the efficiency of the metabolic pathways of providing energy fuel to the muscle cells.

Support the maturation process of muscles. Use throughout the racing season 4 grams in 1 liter water or on the food.

300 gram € 46,00 100 gram € 18,00 300 pills € 28,00
